Request:

Received: 02/03/2010

Query:

Dear Sir/Madame,

For the years 2006/2008, 2007/08, 2008/09, I would like to request the number of call outs for Assault, Assault/Rape, Sexual Assault, Stab, Gunshot or any other categorisation relating to intentional violence by Local Authority area. An excel spreadsheet or equivalent would be perfect. I already have this data for the North West and am trying to get full coverage of England.

I hope you can help and I look forward to hearing from you. If you have any further questions please do not hesitate to contact me.

Kind regards

Response:

Responded: 10/03/2010

Dear

Thank you for your request for information, placed under the Freedom of Information Act (2000) (FOIA)

Please see attachment.

Please note that the data should not be viewed as exclusively reliable for the following reasons:

1. The data has been compiled using the following codes we use within our call management system:

Incident Type = Assault

Illness Code = 65 (Stab/Shot/Weapon Wound)

Illness Code = 53 (Rape/Sexual Assault)

Free text search within '*Illness*' codings using *Assault, Fight, Punch, Kicked, Stabbed, Gun. Domestic, Rape*

2. The 'chief complaint', i.e. injury recorded, may not reflect the cause.

3. The totals for each local authority area reflect the number of incidents attended by ambulance staff although the totals against illness and incident type do not match as where two ambulance crews attended and each records a different illness type, both are included in the 'count'.

4. Finally, some of the illness codes may not correspond, for example '*inter hospital transfer*' may reflect that the patient self-presented at hospital with injuries as a result of an assault etc and was transferred by ambulance for treatment to another hospital.

In short then, I should emphasise that this should not be viewed as authoritative data and the caveats outlined should be made clear in any publication citing the data and its derivation.

Yours sincerely

Gary Bassett
