

London Ambulance Service

NHS Trust

Tender Notice

The London Ambulance Service NHS Trust is the busiest emergency ambulance service in the UK to provide healthcare that is free to patients at the point of delivery.

We serve more than seven-and-a-half million people who live and work in the London area. In 2009/10 we handled almost 1.5 million emergency calls from across London and attended more than one million incidents.

We are currently tendering for the following three services:

1. **Vehicle preparation** – cleaning and replenishing of ambulances
2. **Vehicle relocation** – movement of ambulances within our area
3. **Office and station cleaning** – general cleaning services.

Please note that each of these is a separate tender being run according to the Public Contracts Regulations and each is being advertised in the Official Journal of The European Union (OJEU).

Should any or all of these opportunities be of interest, further information - including closing dates - is available via our e-sourcing portal at <https://londonambulance.bravosolution.co.uk>

Further information about working with us as a supplier can be found on our website at www.londonambulance.nhs.uk/procurement
